

The E-Business Platform for SYSPRO

Better e-Commerce Starts Here

**It's Not Just a Module,
It's a Website!**

**Imagine a Fully Integrated Storefront
That Works With Your Business!**

CyberStore is the web solution to sell your stock items online with real-time, integrated eCommerce shopping cart capabilities that meets your company's Business-to-Consumer (B2C), Business-to-Business (B2B), and/or Business-to-Business-to-Consumer (B2B2C) requirements.

Built on SYSPRO e.net technology, CyberStore does much more than publish your SYSPRO ERP data online; it works with SYSPRO using the same business-logic you use to run your business in the back-office, in real-time.

Keep your customers amazed by controlling a design experience for today's customers. CyberStore uses design themes to control your store's look and feel.

With CyberStore's e-Commerce, you get flexibility to customize your experience to fit your business' story. You can save time and increase productivity with how your orders are entered, processed, invoiced, and paid. CyberStore even goes beyond the cart to give you product management features to help track assets and manage returns and RMAs.

Fully integrated with SYSPRO, so you can be the go-to B2B or B2C supplier!

Think beyond the cart, built to handle beyond the sale!

Flexibility to customize and meet your business needs!

- Friendly, search engine optimized (SEO) category and item page addresses
- Full control of page titles, search words and page descriptions
- Unlimited product taxonomies using item categories
- Dynamic product images with built-in detail zoom capabilities
- Manage characteristics to provide published technical specifications
- Use advanced filtering to help user find the right item for them based on item characteristics
- Build multiple sites in a single CyberStore with the Multi-site Add-on
- Group similar stock codes as SKUs within a single item with CyberStore Models
- Let users shop how they want allowing them to create lists of their own favorite items
- Allow visitors to shop when they want on whatever device they want with responsive design layouts
- When you build products to specification, improve efficiency with our Product Configurator
- Go beyond the cart with features like product registration integrated into SYSPRO serial number.
- Create service requests and generate quotes right from your CyberStore
- Send service reminders about registered products to keep the maintenance cycle flowing
